

1. How do you identify the waiting time? Which station has longest waiting time?

- We can identify the waiting time by the horizontal line which has the slope of graph is 0
- The longest waiting time is at the station Stuttgart

2. What does slope tell you?

- The slope between 2 stations show the train is moving or not, fast or slow.
- Moreover, we can find out that the speed of train (depending on the distance

and time of traveling)
